Assalamualaikum and good morning to Mr/Ms . Thankyou for having me today. My name is nur atiqah from UTHM Parit raja. I am currently third year student in Bachelor of Computer Science in software engineering with honours. Iam 22 years old this year.

Qualities and skills:

Communication Skills: Effective communication is crucial in any role, whether it's conveying ideas to team members, presenting findings to stakeholders, or providing support to clients. I possess strong verbal and written communication skills, allowing me to articulate complex concepts clearly and concisely to diverse audiences.

Problem-Solving Abilities: I thrive in challenging environments where I can apply my problem-solving skills to identify root causes and develop innovative solutions. I am adept at analyzing situations from multiple angles, thinking critically, and implementing strategies to overcome obstacles and achieve objectives effectively.

Teamwork and Collaboration: Collaboration is essential for success in today's workplace, and I excel at working collaboratively with team members to achieve common goals. I am a proactive team player, actively contributing ideas, listening to others' perspectives, and fostering a supportive and inclusive work environment.

Adaptability and Flexibility: In today's fast-paced and ever-changing business landscape, adaptability is key. I am adaptable and thrive in dynamic environments, quickly adjusting to new situations, learning new technologies or methodologies, and embracing change with a positive attitude.

Time Management and Organization: I am skilled at managing multiple tasks and priorities simultaneously, effectively prioritizing work, and meeting deadlines. I utilize organizational tools and strategies to streamline workflows and maximize productivity.

Interest in the Organization:

The forward-looking approach and focus on professional software and IT solutions align perfectly with my career aspirations and passion for technology.

I was particularly drawn to RN Technologies' commitment to developing systems and solutions that address the challenges of the 21st century while making a significant impact through innovation. The emphasis on customization, data security, big data analytics, and mobile applications for both government and private sectors reflects the company's dedication to providing comprehensive and cutting-edge solutions.

In my academic and professional journey in computer science, I've developed a keen interest in leveraging technology to solve real-world problems and drive positive change. RN Technologies' mission resonates with my own goals of contributing to meaningful projects that push the boundaries of innovation.

I'm particularly impressed by RN Technologies' holistic approach to software development, customization systems, and mobile applications, offering a one-stop business solution for clients. This demonstrates a clear understanding of the diverse needs of both government and private sectors and a commitment to delivering comprehensive solutions that drive efficiency and success."

Moreover, I'm eager to bring my skills and expertise to RN Technologies to contribute to its continued success and growth. The opportunity to work with a team of professionals dedicated to excellence in software development and IT solutions is both inspiring and motivating.

In summary, I believe that my background in computer science, combined with my passion for innovation and problem-solving, makes me a strong fit for RN Technologies. I'm enthusiastic about the prospect of being part of a company that is at the forefront of driving technological advancements and making a positive impact on society.

Moreover, the versatility of RN Technologies' products extends beyond accounting to encompass various aspects of business management, such as payroll, human resources, inventory control, and more. This demonstrates the company's commitment to providing holistic solutions that address the diverse needs of its clients across different industries.

I'm eager to leverage my skills and expertise to contribute to the further development and enhancement of products like the e-PRO Accounting System. The opportunity to work on cutting-edge software solutions that empower businesses and drive efficiency is truly exciting to me.

The company RN Technologies has been actively engaged in a plethora of formal events, ranging from Memorandum of Understanding signings to technology exhibitions and training workshops. These events reflect the company's commitment to collaboration, innovation, and professional development within both public and private sectors. As someone eager to immerse myself in diverse experiences and broaden my skill set, I am particularly excited about the opportunity to participate in such events at RN Technologies. Experiencing firsthand the dynamic environment of these events and contributing to the company's initiatives would undoubtedly enrich my professional journey and align perfectly with my aspirations for growth and learning within the organization.

Interest in the Position:

System analyst

I am highly enthusiastic about the System Analyst position at your company, as it aligns perfectly with my passion for analyzing complex systems and optimizing processes to drive efficiency and innovation.

Software Tester

I am genuinely enthusiastic about the Software Tester position at your esteemed company, as it presents an exciting opportunity for me to leverage my meticulous attention to detail and passion for ensuring the quality and reliability of software products. I am eager to apply my expertise in conducting comprehensive testing protocols and collaborating closely with development teams to identify and rectify potential issues, ultimately contributing to the delivery of top-notch software solutions for your valued clients.

Motivation:

How did you prepare for this interview-

I prepared for this interview by thoroughly researching RN Technologies Sdn Bhd, including its mission, values, products, and recent developments. I practiced answering common interview questions and rehearsed articulating my experiences and achievements effectively. Overall, I approached this interview preparation with dedication and attention to detail to ensure I could present myself as a strong candidate for the position.

What is important to you in job –

Several factors are important to me in a job. Firstly, I value opportunities for professional growth and development, whether through challenging projects, ongoing training, or mentorship programs. I also prioritize a supportive and collaborative work environment where I can learn from my colleagues and contribute to meaningful projects as part of a team. Additionally, I look for roles that align with my personal values and allow me to make a positive impact, whether it's through innovation, problem-solving, or helping others.

What motivates you to put forth your greatest effort –

I am motivated by a desire to continuously learn and grow, as well as by the opportunity to make a meaningful impact through my work. I thrive in environments where I am challenged to think creatively, solve complex problems, and innovate.

What are your long-range and short-range goals and objectives –

My short-range goal is to secure an internship position at RN Technologies Sdn Bhd where I can apply my skills and knowledge in computer science to real-world projects. During this internship, I aim to gain hands-on experience, expand my professional network, and learn from experienced professionals in the field. My long-range goal is to establish a successful career in the technology industry, potentially pursuing roles in software development, data analytics, or project

management. I aspire to become a subject matter expert in my field, continuously seeking opportunities for growth and advancement.

How are you preparing yourself to achieve them? –

To achieve my short-range goal of securing an internship at RN Technologies Sdn Bhd, I have been actively enhancing my technical skills and knowledge through coursework, self-study, and personal projects. I have also been networking with professionals in the industry, attending relevant events, and seeking mentorship to gain insights into the field and potential internship opportunities. Additionally, I have been refining my resume, portfolio, and interview skills to effectively showcase my qualifications and enthusiasm for the role. For my long-range goals, I plan to continue pursuing educational and professional opportunities that align with my interests and aspirations, seeking out experiences that will help me grow and advance in my career.

Communication Skills:

Have you ever had to get a point across to different types of people? What approach

did you take?

Yes, I've had several experiences where I needed to communicate effectively with different types of people. In such situations, I believe in tailoring my communication approach to suit the individual's preferences, background, and level of understanding. For instance, when communicating with someone who prefers detailed explanations and facts, I focus on providing clear and comprehensive information with relevant examples and data. Conversely, when interacting with someone who prefers a more concise and visual approach, I use simplified language, diagrams, or visual aids to convey the message effectively. Overall, my approach revolves around adapting to the communication style of the person I'm engaging with to ensure mutual understanding and clarity.

Give me an example of how you would explain a complicated procedure to someone

who was new to the situation.

ertainly. Let's take the example of explaining a complicated procedure, such as setting up a secure network connection, to someone who is new to the situation. I would start by assessing the individual's existing knowledge and understanding of the topic to gauge where to begin. Then, I would break down the procedure into smaller, more digestible steps and use simple language to explain each step in sequential order.

For instance, I might begin by explaining the concept of a network and why securing it is important. Then, I would outline the specific steps involved in setting up a secure network connection, such as configuring a firewall, implementing encryption protocols, and establishing user authentication mechanisms. Throughout the explanation, I would use analogies or real-life examples to illustrate complex concepts and make them more relatable.

Additionally, I would encourage the individual to ask questions and seek clarification on any aspects they find confusing. I believe in fostering an open and supportive environment where the person feels comfortable expressing their concerns and seeking assistance as needed.

Overall, my approach to explaining a complicated procedure to someone new to the situation involves breaking down the information into manageable chunks, using simple language and relatable examples, and providing ample opportunity for questions and clarification. By doing so,

I aim to ensure that the individual gains a clear understanding of the procedure and feels confident in their ability to execute it effectively.
